

Best budget tablet Blackview Tab 9 will soon hit the market with Doke OS_P 1.0

New York, New York City, May 6, 2021 ([Issuewire.com](https://www.issuewire.com)) - Blackview is a thriving rugged outdoor brand that has gained great popularity globally over these years. Based on the solid rugged phone customer foundation, [Blackview has expanded the product range to include tablets](#), smartwatches, earphones.

Meanwhile, Blackview has been devoting much effort to OS development. If you have had hands-on experience with the latest devices from Blackview, you would have probably known the enhanced efficiency and fluidity especially compared with the old models from Blackview, as well as the counterparts from the peers.

The Blackview Tab 9 runs their originally self-developed OS, Doke OS_P 1.0.

Outstanding features include:

1. Exquisite App Icons

The app icons feature gradient color, a level of transparency, and enhanced with mildly stereoscopic effect for exceptional aesthetics and consistency.

2. Gaussian Blur

Highlight the main task window by blurring the background so the user can focus on what they are up to. Gaussian Blur applies to the dropdown menu, folder, drawer.

3. Customized Color & Temperature

Support full-color temperature management which allows the system to adapt in the overall visual quality. This opens up more ways for you to personalize your device.

4. Classy Overall Visual

The overall visual is more clean, classy, and comfortable with exquisite app icons, gaussian blur, customized color & temperature, better menu spacing. Easy for the eye and operation.

5. Enhanced productivity with Notes

Write key things down with the Notes! Now it supports image and voice recording insert, text entry, handwriting, to-do-things reminder, etc.

6. System Manager

Ensures efficient system performance with System Manager to control over trash cleaning, battery performance, gaming boosting, and how apps run in the background.

All of these features bring definite strength to the overall performance from the UI to the efficiency. Like most of the products from Blackview, Tab 9 also features a massive battery of 7480mAh, which supports 6 hrs of video time, 6 hrs of game time, 7.5hrs of web browsing time, 38 hrs of music time, and 30hrs calling time.

The extended battery life makes it ideal to carry around without the hassle of carrying messy cables.

In terms of design, Blackview Tab 9 is satisfying in every way. Featuring an 8.9mm slim body, a screen covered in glass, and a unibody design made out of aluminum, Tab 9 delivers a high-class and luxury taste in appearance.

For anyone with business needs, Blackview Tab 9 is a great choice as it supports SIM cards so you can use it outdoors without worrying about the lack of network connection. And it supports an external keyboard for fast and error-free typing. Click [here](#) to learn more about the device.
