

Bob Lund, ND, DNM, TN, CTH, RCPC, CNT - Naturopathic Physician

Get to know Naturopathic Physician Dr. Bob Lund, who serves patients throughout the U.S and the world.

New York, New York City, May 26, 2021 ([Issuewire.com](https://www.issuewire.com)) - Dr. Lund, (Docbob!), is a board-certified Doctor of Natural Medicine, Traditional Naturopath, Certified Tribal Healer (First Nation Medical Board), Root Cause Protocol Consultant, Certified Nutritional Therapist, and Intelligent Design Healing Facilitator. He specializes in getting to the root of illness, focusing on how to be healthy, rather than managing disease symptoms. Dr. Lund not only serves patients internationally but also makes old-fashioned house calls, along with seeing clients during in-clinic visits in Oregon.

Since every person is a unique creation, made with love by God, he helps people restore their bodies to the “blueprint” and context that they were created to thrive in. He is passionate about helping people experience all the energy and vitality they need in order to be all they can be and do all they can do to walk out their purpose for their lives... so that they can die “young” at a very old age!

Specializing in epigenetics, Dr. Lund helps identify lifestyle and environmental elements that distract the body from health and vitality and trigger genetic-tendency health problems. He utilizes numerous modalities, including blood lab analysis from a functional/holistic perspective, past trauma identification, and analysis, herbal medicine, metabolic balancing, live blood microscopy, earth grounding, “sick” building remediation (mold/toxins/EMFs), nutritional and vitamin/mineral therapy, microbiome restoration therapy, and many other traditional naturopathic healing techniques.

Having been blood and nutritional researcher for over 30 years, he has authored and published numerous medical journal papers.

The practice of naturopathic medicine includes modern and traditional, scientific, and empirical methods. Naturopathic medicine is a distinct primary health care profession, emphasizing prevention, treatment, and optimal health through the use of therapeutic methods and substances that encourage individuals’ inherent self-healing process.
