

Calculating the Price of your Tattoo Has Never Been Easier

California, Los Angeles, May 31, 2021 (Issuewire.com) - Tattoos Wizard launches a unique online tool that accurately calculates the price of a future tattoo. The tattoo price calculator is the first (and only) of its kind and is available [here](#). To give you an estimation of your future price, the system asks for your location, the size of the desired tattoo, and how experienced the artist is.

“We are thrilled to introduce our new tattoo price tool,” Johan stated. “It’s a total game-changer for those who are wanting to get the price before getting a tattoo. We are blown away by the amazing response we’ve had so far. I think we are really onto something great and obviously, our tattoo enthusiasts feel the same way.”

In order to access the price calculation, users are asked a few simple questions such as the city they plan to get their tattoo in. They are also asked about the design and color. Equipped with the information, the [Tattoos Wizard](#) tool does its magic and delivers an estimate.

“My estimate was right on the money,” raved a Tattoos Wizard tattoo price tool user. “I was shocked when I went to get it done and it came out almost to the penny of what the calculator said it would be. I’m seriously impressed!”

Tattoos Wizard is a site dedicated to all things tattoos. It also matches individuals with their ideal tattoo artist all across the country and seeks out studios for users as well.
