

Chandigarh Group Of Colleges Landran Introduces Three New Programs

CHANDIGARH GROUP OF COLLEGES

Building Careers. **Transforming Lives.**

Punjab, Mohali, May 25, 2021 ([Issuewire.com](https://www.issuewire.com)) - The modern era calls for technological advancement and to do so, new-age education is a must. To keep pace with these changing trends, CGC Landran has introduced three new academic programs to its curriculum starting the session 2021-22. These three degrees include [B.Tech Artificial Intelligence and Data Science](#), B.Sc. Cyber Security and B.Sc. Data Analytics.

The reckoned technological advancements open gateways to various opportunities all over the world. The prevalent trends indicate that in the coming future everything will be handled by technology. That is why the college included the B.Tech Artificial Intelligence and Data Science degree in its curriculum. Another thing about this degree is the voluminous future scope. Candidates would be able to get into companies like Apple, Amazon, Google, etc.

Likewise, the other two degrees ensure a bright future too. With a degree of [B.Sc. Cyber Security](#), the candidates would be able to get absorbed into the topmost firms. Government sectors also hire professionals with adequate experience and qualifications in this field who can protect their online data.

The third academic program, B.Sc. Data Analytics revolves around the principles of storing, managing, and analyzing big data. Today, every company is data-driven and this data can help companies in understanding the trends too. With efficient data management and analysis, companies save a lot of time and money. Therefore, they need well-versed candidates. Also, it is a demanding job that pays well. So, the inclusion of this program was largely influenced by its scope in the modern world.

Chandigarh Group of Colleges Landran has always intended to bridge the gap between talent and seekers. So, it extends facilities via which students get to develop the quintessential traits. The college already has received more than 6617 placement offers with packages as high as 35 LPA and is aiming for higher.

To sum it up, CGC Landran has launched three new courses namely B.Tech Artificial Intelligence and Data Science, B.Sc. Cyber Security and [B.Sc. Data Analytics](#) owing to their higher demand in the times to come. There are budding opportunities that can only be unlocked after one has completed the

degree. Therefore, get admission to the college before the seats get full!

To know further details, visit the official website of the college or contact on the given numbers. The clock is ticking.
