

Crypto Exchange Aggregator Swapzone Adds One-Click Deposits

California, San Francisco, May 4, 2021 ([Issuewire.com](https://www.issuewire.com)) - As a stickler for ultimate convenience, [Swapzone](#) has now added WalletConnect and MetaMask support, offering the simplest way to connect to wallet applications of choice when depositing with ETH or other ERC20 assets.

Bridging communication between the platform and multiple wallets, WalletConnect allows Swapzone's

users to instantly log in to their WalletConnect-supported wallets by using a simple QR code to make an ETH deposit.

To facilitate depositing with ERC-20 tokens, Swapzone's integrated MetaMask – for users to interact with their wallets in a handful of seconds.

Adding cutting-edge one-click functionality actively promoted by many market giants, Swapzone hopes to level up the crypto exchange game and ensure even smoother user experience by equipping users with an option to manage their funds without opening multiple tabs at once.

Users can still follow the beaten track, however, these cryptographically-secure options seem to be a much more desirable alternative for many.

About Swapzone

Swapzone is an [instant cryptocurrency exchange aggregator](#) with zero custody and no registration needed. The service searches for available fixed-rate and floating-rate offers, sorts them out by real-time rates, speed and rating, and lets users make an in-house exchange through partners' APIs.

Having integrated more than 15 exchange partners, listed over 500 crypto assets and developed common user flow for every exchange, Swapzone helps users navigate through the field full of services and tools, all while ensuring convenience, validity and transparency valued on the modern crypto market.
