

## **Duchess Kate's beauty secret revealed!**

**Vogue reveals: No facial lines – no injections – organic Biotulin**

**New York, New York City, May 12, 2021 ([IssueWire.com](https://www.issuewire.com))** - Kate, the Duchess of Cambridge, has been in the royal spotlight for 10 years now without ever really deviating from her signature beauty look. Although she rarely gives any insight into her personal beauty routine, sources close to the Duchess hint at what some of her beauty secrets may be.

According to British Vogue on 29th April 2021, Biotulin anti-aging gel is one of Kate's 7 beauty secrets.

Back in 2015, the Spanish newspaper, El Mundo, was already reporting on Kate's preference for Biotulin as her preferred method of keeping facial lines at bay.

But what is the secret of Biotulin? One of the main ingredients of Biotulin is spilanthol, a local anaesthetic extracted from the Acmella oleracea plant (paracress). It reduces muscle contractions and relaxes facial features. Fine lines disappear – especially around the eyes and between the eyebrows. Biotulin is the best organic anti-ageing product with botulinum toxin on the market.
