[The UK's No.1 Turnkey eCommerce Agency Sourcing & Selling Profitable Products](#)

Why use iStoreLabs?

This completely automated Amazon/Ebay store will function without your effort. Profits will be tracked daily through your mobile application. Realistically generate at least £5,000 in 6-9 months. With a simple setup process, this is a hands-free, affordable venture for anyone that wants to make their money work for them.

At iStoreLabs, we build fully managed online stores for our clients with a money-back guarantee to profitability.

Our team of cross-sector experts source profitable products, list them on your eCom store globally and then fulfil incoming orders, manage inventory, customer service. This end to end process from sourcing and updating the product line, to order fulfilment, is performed continuously every day. Payments are made directly into your bank account every two weeks, at which point we take a profit share fee depending on your chosen package.

So how does it work?

- We know how E-commerce stores work. We have a largely offshore team of product researchers and customer service agents dedicated to managing these stores. Once you come on board, our team will build your store. When it is live and generating revenue for you, we take a small percentage of the profit to cover overheads. You get a passive income, we increase our margins and everybody wins.

How much money can you make?

- This completely depends on you. It depends on how you price the items on your website and how much traffic you bring to your store. The great advantage of joining a drop-ship program is you do not have to spend any money upfront on inventory, warehousing & employees. So your time and effort can be focused on marketing your business and your website.

Can you pick which items we want to sell?

- Yes, you can pick whichever items you want to sell.

Can I add my own Item?

- Yes, you can add your own items to your store.
