

Jerry Y. Chang, MD, an Interventional Radiologist with Eisenhower Medical Center

Get to know Interventional Radiologist Dr. Jerry Y. Chang, who serves patients in Rancho Mirage, California.

New York, New York City, May 5, 2021 ([Issuewire.com](https://www.Issuewire.com)) - Specializing in interventional radiology,

Dr. Chang has been with Eisenhower Medical Center for five years.

“I chose the field of radiology because of its significant impact upon the practice of medicine, assisting physicians of all specialties in their management of patients. Additionally, the field is constantly evolving, using the most advanced technology in order to impact upon patient care” expressed the doctor.

The Eisenhower Medical Center is a not-for-profit hospital based in Rancho Mirage, California serving the Coachella Valley region of Southeastern California. It was named one of the top one hundred hospitals in the United States in 2005.

After graduating magna cum laude from the University of California, San Diego with a Bachelor of Science degree in Biochemistry and Cell Biology, Dr. Chang attended medical school at the Keck School of Medicine of the University of Southern California. He completed his residency program in internal medicine at Santa Barbara Cottage Hospital and his residency in diagnostic radiology at UCLA Medical Center. Additionally, he completed his fellowship in vascular and interventional radiology at UCLA.

As a testament to his success, he is board-certified in diagnostic radiology and radiology by the American Board of Radiology (ABR). The ABR is a not-for-profit physician-led organization that oversees the certification and ongoing professional development of specialists in diagnostic radiology, interventional radiology, radiation oncology, and medical physics.

Licensed by the Medical Board of California, Dr. Chang is a member of the Society of Interventional Radiology, the Los Angeles Radiological Society, the American College of Radiology, the American Roentgen Ray Society, and the Radiological Society of North America.

Interventional radiology is a medical subspecialty that performs various minimally-invasive procedures using medical imaging guidance, such as x-ray fluoroscopy, computed tomography, magnetic resonance imaging, or ultrasound. Interventional radiologists use x-rays, CT, MRI, or other imaging guidance to navigate small instruments, like catheters and needles, through blood vessels and organs to treat a variety of diseases.

On a more personal note, Dr. Chang is fluent in both English and Chinese.
