West Virginia, Dunbar, May 12, 2021 ([Issuewire.com](https://www.issuewire.com)) - [OFIYAA](#) is a multifunctional and portable dual-screen laptop monitor, which can quickly build a personal mobile workstation. Turning a computer into three, users can view the content on three screens at the same time and realize efficient multitasking. It is equipped with a USB/HDMI/Type-C interface to connect peripherals such as cameras, video devices, Android phones, etc. Wherever the user is, they can set up their own mobile workstation

to start working efficiently.

OFIYAA comes with a built-in stand that can be adapted to the shell of 13-17 inch laptop computers, and each screen can be individually adjusted and set display parameters. It uses an 11.6-inch, 16:9 FHD high-definition display with a resolution of 1080P/60HZ (1920*1080P). Utilizing wide viewing angle technology, the user can clearly watch the screen content from multiple angles without distortion. And with a full rotation angle of 270°, users can find the best viewing angle for any situation, even if there are multiple people viewing from different angles at the same time.

OFIYAA is equipped with a USB/HDMI/Type-c*2 interface, which can not only connect to a computer but also to a mobile phone, turning the mobile phone into a computer. It can also be connected to digital devices such as digital cameras, game consoles, mice, keyboards, mobile hard drives, etc., making it an external screen for the device, which can meet various display needs in everyone's life. It is compact, convenient, and powerful!

OFIYAA is made of high-quality industrial materials and can withstand the wear and tear of carrying laptop computers. It has passed 10,000+ times repeated folding fatigue tests and can be used for at least 5 years or longer. Its weight is only 1.33KG, and the size is 315*215*39MM, which is convenient to carry, and the user can set up their personal workstation at any time in a backpack. Fortunately, when users are at home or need to go out to work, the lightness and practicality of an extra monitor will provide enormous help.

In our current age of speed and technology, multitasking and efficiency are very important. Find out how to improve your workflow with a second monitor.

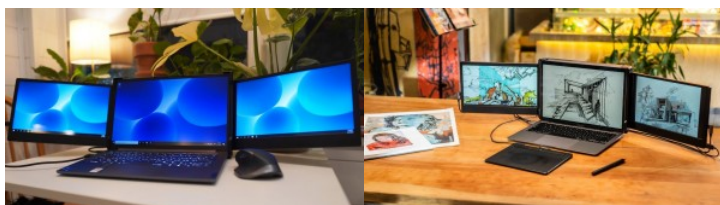

Over the past few decades, our society has continued to move faster and faster, mostly due to the incredible advancements that have been made in technology.

Prior to the computer era, many activities were accomplished manually by hand, like writing a novel by means of the traditional pen and paper method. Entertainment often involved focusing on a single activity, like focusing all of one's attention on playing a game of soccer or concentrating solely on a single book.

Now that personal computers are found in abundance, American culture seems to be shifting over from focused singular tasks to multitasking.

Monitors were once expensive, sometimes so expensive that they contributed to nearly 50 percent of a new computer system's cost. Nowadays, the cost of a monitor has gone down, and purchasing multiple monitors for a single computer system is becoming a popular choice.
