

Offer on Single Page Website Design

SINGLE PAGE WEBSITE DESIGN

United Kingdom, West Lothian, May 12, 2021 ([Issuewire.com](https://www.issuewire.com)) - V1 Technologies have come up with the latest offer for all our customers. The newest proposal is valid from today and will cover clients from across the globe. We are here to provide affordable service and ensure customers are more than satisfied. As a part of our promise to provide budgeted service, V1 Technologies now offers a discounted price for customers planning to go for [Single Page Website Design](#).

The latest offer is a part of our plan to make service more available for businesses during the pandemic. As a leading website and mobile app development company based in London, we plan to target businesses specifically with zero online presence.

It is undoubtedly true that the rise in novel coronavirus and the periodic lockdown has severely hampered the business. Keeping in mind all such concerns, we have planned to offer a Single Page Website for companies planning to kick-start their online journey.

Free Website Design Service For Single Page Website

The latest offer also comes with free website design works. Designing is undoubtedly an important part when working on a website. However, our company plans to offer free design works as per your business requirements.

As a part of designing, team V1 Technologies cover overall work. This includes the creation of templates, line-ups, and other features of the design works. Our professional designers ensure high-quality results. We offer the best design work.

Domain Hosting and Web Hosting

V1 Technologies at present is not offering free domain and web hosting. This means our customer has to pay for the domain hosting and web hosting part for Single Page Website Design Service.

While a website needs to have a domain and run web hosting, this part is totally under the customer's portfolio. As of now, we're only providing Single Page Website Design Service for free.

If you need a [website development company in London](#), you can always benefit from our latest offer. You get a bespoke single-page website with feature-laden properties.

What are the features?

V1 Technologies offers packed up features in the latest Single Page Website Design Service. These include:

- Simple web design that ensures better user experience when browsing the website
- The website is absolutely compatible on mobile screens and adjusts automatically as per the screen size
- We provide the right combination of website content and white spacing that gives a perfect outlook
- An excellent quality website that offers smooth and flexible navigation
- The website comes with precise information with relevant keywords, ensuring less loading time
- The website guarantees a higher conversion rate with a single page mobile-friendly platform
