Internal medicine or general medicine is the medical specialty dealing with the prevention, diagnosis, and treatment of adult diseases. Physicians specializing in internal medicine are called internists. They manage and prevent common and complex diseases by providing comprehensive care and promoting overall well-being.

Radiology is a medical specialty that uses medical imaging to diagnose and treat diseases within the bodies of both humans and animals. A radiologist is a medical doctor who is trained in executing and interpreting medical images such as X-rays, CT scans, ultrasounds, and MRIs and using them to treat health problems in patients.
