

PCAIT is helping IT partner community with Oxygen Concentrators & BiPAP Devices

Delhi, New Delhi, May 16, 2021 ([Issuewire.com](https://www.issuewire.com)) - The Progressive Channels Association of Information Technology (PCAIT) is helping its members, nonmembers IT partners, and their employees with Oxygen Concentrators and BiPAP devices in this tough time when oxygen is the most valuable thing here in India to save someone life during this second wave of Covid19.

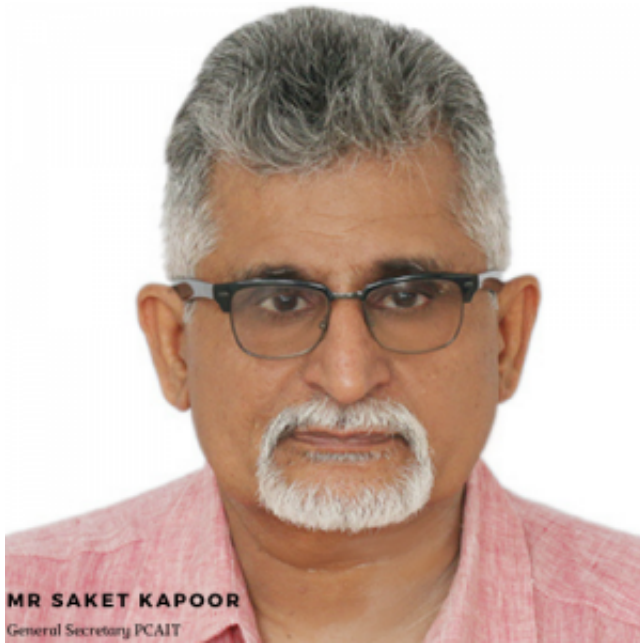

With the help of its member, a pool of **Oxygen concentrators** and **BiPAPs** devices has been created to serve the community. Whenever a PCAIT member or their employee required Oxygen concentrators, they need to inform the concerned team through an email or a phone call with all required detail; [PCAIT](#) will arrange the Oxygen concentrator for that member or their employee as early as possible. Then, after the successful treatment, the PCAIT member can deliver it back.

PCAIT members **Supertron Electronics Pvt. Ltd.**, **Comnet Vision India Private Limited**, and [Unistal Systems Pvt. Ltd](#) has contributed the equipment till now. We are expecting more members to join shortly for this noble cause.

In this pandemic, a vaccine is our best bet. However, in the current situation where the strain badly affects the lungs, an oxygen concentrator and BiPAP devices work as '*sanjeevni bootie*', helping saving lives.

PCAIT, as expected, has proactively risen to the need of the hour by consolidating the resources and providing much-needed Oxygen support to ailing patients, said **Mr. Saket Kapoor, General Secretary PCAIT**.

Mr. Alok Gupta, President PCAIT, told that PCAIT as a family stands together in this pandemic and is trying our best to support each member and their employees in the best of our capacity. Together, we will fight and win this pandemic. This is what PCAIT does and stands for '**Judo Jodo Aage Badho.**'
