

# Ratatat Studio's Project: Skyscraper Teaser Revealed

An Extraordinary FPS Masterpiece

**South Korea, Seoul, May 7, 2021 ([Issuewire.com](https://www.issuewire.com))** - Ratatat Studio (CEO Peter Jang) has unveiled a teaser video for the next-generation shooter game *Project: Skyscraper*.

*Project: Skyscraper* is an online FPS(First-Person Shooter) game set in an open world. The game's environment was inspired by a famous North American city and is set in the near future.

The teaser features a breathtaking view of the city center and a magnificent wingsuit gliding from a high-rise skyscraper.

The gameplay uses an advanced parkour system that maximizes the freedom of the character's movement. Furthermore, players are free to explore strategic aspects of the gameplay, such as the weapon equipment, vehicles, and geographical features.

Hwang Wang-Jun, creative director of *Project: Skyscraper*, said, "The keywords for a teaser video are *characters* and *the city*. We tried to create unique characters and familiar downtown landscapes that millennials and Generation Xers will love."

*Project: Skyscraper* is slated for release early next year. Game updates can be found on its official Twitter account.

- **Introduction to Ratatat Studio**

Ratatat Studio Co., Ltd. is a game development studio. Established in 2015, it is the second development studio founded by CEO Peter Jang, who also developed the online FPS game *War Rock*. Peter's first studio, SS Studios, is currently working on PC online-based projects and Mobile Game Headquarters with two development teams.

SS Studios is developing a shooter game (Project: Skyscraper) aimed at the next-generation PC online/console platform, along with a hybrid casual game called CoinDragon Master.
