

Safe Dining Guidelines from Server Products

Wisconsin, Germantown, May 6, 2021 ([IssueWire.com](https://www.issuewire.com)) - Server Products has released a checklist to ensure diners can feel safe and confident when eating out, made for consumers looking to reengage their restaurant dining habits and support their favorite foodservice locations. It can be quickly accessed on a mobile phone and easily consulted when choosing a restaurant to visit.

The condensed guide includes individual behaviors to help promote safety, along with precautions to look for in the order and pick-up area, dining room, condiment, and beverage stations. From familiar tips like social distancing and masks to innovative touchless equipment recommendations, all of the Server's tips are designed to promote a comfortable and sanitary eating experience without extra hassle for the customers or staff.

Diners are encouraged to hold themselves and restaurant employees up to safety standards when returning to eating out, in order to support the foodservice industry without compromising the health of guests or staff.

Server's dining guidelines provide a fast, clear way for customers to make sure their favorite restaurants have the proper precautions in place. The safe dining checklist is available for viewing and download [here](#).
