

SITEL is a food, agro, and water analytical testing laboratory based at Mumbai, India

Maharashtra, Mumbai, May 21, 2021 ([Issuewire.com](http://www.issuewire.com)) - **SITEL Laboratory** is set up in a 60,000 sq. ft. of own premises at Virar with state of the art sophisticated instruments to provide accurate and reliable results to the consumers and industry. With the growing concern of the consumers towards the quality of the food they buy and eat, the importance of food testing has increased tremendously. We work in the area of **Food, Water, and Agriculture** raw material and product testing.

The quality of the product is an important aspect that affects the product acceptability and cost. Food quality and safety are crucial parameters for good health and hence food contamination and food adulteration are matters of worldwide apprehension. Water needs a quality check to ensure it adds more benefit to life than harm. We ensure the quality and safety of the product with definite testing results generated at our well-equipped testing lab.<http://sitellab.com/service.html>
