**Karnataka, Bengaluru, May 30, 2021 ([IssueWire.com](https://www.issuewire.com))** - Today, every start-up needs people with the right skills to produce a result in minimum time and quickly align with the start-up's mission and strategies. Edtech company TechPledge Consulting announced the launch of the **TechPledge Academy for startups**.

This initiative aims to provide start-ups with the detailed insight and training to map their digital stratagem, identify automation opportunities in their line of business, and right skill dearth in the latest technology and tools through an all-inclusive hybrid (online and onsite) self-paced and consultant-led training content.

TechPledge Academy for Start-ups platform designed for the entire organization, from employees to Top-level executives to get the entire organization transformed in the digital world.

In today's fast-changing world "stay relevant" and "transform to remain Agile" is the new success formula for every startup and perfectly describes the foundation for every company's digital transformation. In a startup, every individual who wants to stay tuned to the organization's fascinating journey needs to learn new things. The Techpledge Academy for Startup cover ground up to advance of technology and process to achieve high competencies in cloud technologies, Big data, Artificial Intelligence, Machine Learning, DevOps Automation, and Digital Marketing.

Academy for a startup is a flexible, customizable platform and can cater to every industry segment where the startup operates and for every level and role with TechPledge's result-oriented learning framework.

As per **Ms. Shruti Sinha** Founder & CEO of TechPledge Consulting, TechPledge is a Pledge (Oath) to prepare a better and responsible tech community. Nowadays there is a gap in skills required by industry vs Job Aspiration possess skills. This gap is getting widen because still most of the training happens around the same pattern. As per one of the surveys, Approx 71% of companies have struggled to find skilled candidates for their vacant positions. Cloud Technologies and Big Data related positions grow at an exponential rate, and the modern workforce has a hard time keeping pace with those developments. Our TechPledge Academy for Startup promises pinpoints training and not the generic one. It helps to prepare the skilled manpower with the exact required skills in a very short time.

TechPledge Academy for Startup offering include following unique Features

1. We have developed a unique **Capability Based Assessment(CBA)** . The CBA is then customized as per individual early-stage evaluation.
2. We have developed the replica of a real-time industry scenario with tools and processes used in production, we called it **Customer Immersion Environment (CIE)**. Every Individual has to complete their assignment in this environment.
3. We use Modern Technology, Audio /Visual App to make them understand technology better.
4. Every Session get Recorded and recording made available on our online platform, which can be assessed by candidate anytime, from any device, and from anywhere.
