California, Los Angeles, May 24, 2021 (Issuewire.com) - The UNIQUE Mouth opening exercise device in India is patented, clinically tested, and the award-winning device for jaw exercise which helps trismus-affected patients to increase the mouth opening. Innovated by 21 years experienced 18 awards

winner Cosmetic Implantologist [Dr Bharat Agravat](http://www.drbharat.agravat.com) (www.drbharat.agravat.com)

UNIQUE Mouth opening device for Oral Submucous Fibrosis provides a better guided assisted jaw motion rehabilitation system by exerting even pressure on muscles of mastication by taking support over Maxillary and Mandibular dental arch, cover all multi-rooted posterior and single-rooted anterior teeth with adjustable force over the Jaw; ease of use makes it very supportive for the patients, Prevent broken and fracture of existing teeth, In post-radiation fibrosis patients, In Carcinoma patients half the jaw arch removed.

The method of using it is very simple. First, you need to check if you can open your mouth or not, then use the osmf capsule with water after a few minutes, take the osmf gel and rub it into your mouth and gums. After some time, wash your mouth gently with water. Then take this mouth opening device and try to open your mouth with it. Try as you can. Try 2 to 5 minutes 10 times each time. Then blow your face with air and you can do it 18 to 25 times every day. Before using the device, use the OSMF lollipop into your mouth and exercise with it. Use the device 3 to 4 times every day and you will get a good result from the first day.

It comes with great advantages like, it is made of high-quality stainless steel. With the screw thread mechanism mount opening, it can be increased easily.

It is developed by [Smile in Hour®](http://www.smileinhour.in) (www.smileinhour.in), which is an award winner of India's first Dental Tech start-up's DPIIT Recognised startup India and developed the Oral-care and Dental Product and Services.

The patient who has experienced the Dental mouth opener instrument said, "It is a very good mouth opening exercise device for oral submucous fibrosis treatment. My husband used this mouth opener for one month and his mouth jaws started opening. I'm very much sure that it will open up to three or four fingers in two months."
