

# 5 Great Reasons to Become a Salesforce Developer

## Salesforce Consulting Services

Virginia, Reston, Jun 29, 2021 ([Issuewire.com](https://www.issuewire.com)) - 5 great reasons to become a Salesforce Developer

The fact that Salesforce roles so often get shout-outs like these is indicative of the amazing opportunity they present, and clearly, Salesforce development especially may be a strong choice immediately. Let's take a glance at a number of the explanations why Salesforce Developer is such an incredible career option.

### 1. Work with a world-dominating technology

Salesforce is that the world's leading CRM platform. It's posted a mean year-on-year growth of 25% for the past four years and has ambitious plans to double its growth over subsequent four.

And a serious part of that growth goes to be the creation of the latest Salesforce positions—an estimated 3.3 million new jobs by 2022, to be exact.

As digital transformation continues to roll across the planet, leaving no industry untouched, the demand for cloud professionals is about to skyrocket, and people with experience in developing the world's hottest CRM are going to be massively wanted.

### 2. Enjoy extensive job opportunities

Demand for Salesforce professionals is increasing rapidly; much more quickly than the workforce can upskill to satisfy it.

As a result, the Salesforce job market may be a candidate's paradise; a buffet of opportunities where Salesforce Developer roles outnumber talent 4:1.

An average of 390 new Salesforce Dev positions are created monthly in North America, and as businesses compete to draw in the simplest talent, qualified developers have much leverage to barter the salary, benefits package, and dealing conditions they're trying to find.

A recent report summed up the wealth of opportunities for Salesforce Developers, stating that "workers with Salesforce Developer skills are going to be ready to work where they need and for top pay."

### 3. Be involved in an exciting, innovative platform

Salesforce has been around for 2 decades, but it's showing no signs of standing still.

Salesforce releases updates and rolls out innovative new features 3 times a year. The set of tools available to Developers is consistently evolving too, ensuring Salesforce is usually at the forefront of the latest advances and trends. Salesforce is all about making its customers' lives easier, so whatever's making waves in the tech, you'll make certain the Salesforce team is hustling to include it into the platform. Whether that's AI, blockchain, or serverless computing, Salesforce Developers are never at the rear of the road when it involves getting access to those cutting-edge developments in order that they can put them to figure in their own organizations.

As a Salesforce Developer, you don't need to concern yourself with the underlying infrastructure you're building on. Its single codebase makes it easy for devs to focus solely on apps and data, safe within the knowledge that new features will just work. meaning you've got space to require a business-led approach to solutions, think outside the box, and flex your creative muscles.

### 4. Be a part of an inclusive community

Salesforce has been named within the top ten companies to figure for in each of the past four years. the corporate was named during an II|one amongst|one in every of"> one among Forbes's World's Most Innovative Company eight years in a row and came in second on Fortune's 100 Best Companies to figure For® list.

But it's not just the pros performing at its headquarters that Salesforce is committed to offering a rewarding and fulfilling career.

The Salesforce ecosystem is notoriously welcoming, helpful, and collaborative. referred to as the Ohana, the Salesforce community consists of internal employees, those that work for patrons, partners, or ISVs, and freelance Salesforce pros.

Being a part of the Ohana is all about sharing the culture that Salesforce is made on, and embodying trust, growth, innovation, and equality in your lifestyle. If you're employed with Salesforce, you'll never be in need of guidance, support, or a way of kinship.

## 5. High earning potential

Last, but never least, is that the enormous earning potential that Salesforce Developers enjoy. With Salesforce customers and partners alike in constant competition for the simplest talent, the ecosystem's supply and demand problem is driving up wages.

The average salary for a software developer within the US is around \$85,500. Salesforce developers, on the opposite hand, earn between \$111,232 and \$161,418m counting on experience, consistent with our latest salary survey.

Hourly rates for freelance Salesforce Developers are impressive too, with contractors commanding between \$70 and \$155 per hour on average.

Specializing in certain aspects of [Salesforce consulting services](#), like Sales Cloud or Visualforce, for instance, can boost your earning potential further, and netting certifications can have a positive impact on your worth as knowledgeable too.

Avail services like ServiceNow, RPA, cybersecurity solutions from [Txxel](#).
