

# Achieving Positive Patient Outcomes and and Bottom Line Results

A Professional Guide for Improving Healthcare Professional Performance Levels and the Global Patient Experience

**A Must Read for Healthcare Professionals**

Over two-hundred-plus patient commentaries reveal valuable insights about how to create improved patient-centric care environments. Learn how to improve clinician-patient relationships and achieve enhanced levels of patient satisfaction. Improve the patient care process on a micro and macro level through the implementation of the principles set forth within this educational reference guide.

Learn about patient preferences and feelings related to the universal healthcare system and life after a diagnosis. The shared real-life patient commentaries explore a broad scope of diagnostic, psychological, and personal issues:

"If only..."  
"My life will never be the same!"  
"I feel I am fading into invisibility."  
"I need someone to please listen!"  
"I have been sabotaged by this ungodly disease."  
"I am not just a medical chart or record number!"  
"I wish I knew more about my condition and treatment options"

Shared are explicit thoughts from patients on a variety of vital topics related to the global patient care experience. The cited evidence-based research data and resulting critical teachings contained within are derived from a thoroughly executed twenty-plus-year qualitative study.

Patient Centricity is recommended as an essential educational tool for healthcare facility administrators, staff developers, educators, counselors, nurses, caregivers, and physicians. Patient expectations need to be clearly understood and prepared for throughout the course of a treatment plan. Healthcare professionals will be able to reference this educational tool to help create superior plans of care resulting in enhanced psychosocial and clinical outcomes among their patients. This educational resource guide is designed to educate and benefit healthcare professionals across the universal spectrum of care.

**California, San Diego, Jun 1, 2021 ([IssueWire.com](http://IssueWire.com)) - Patient Centricity is a must-read for healthcare professionals across the spectrum of care. Please look into this newly released healthcare worker training tool to expand your personal and professional knowledge base. This training guide provides information to successfully meet the essential psychosocial and mental health needs of the universal patient and healthcare professional.**

**All healthcare organizations worldwide are required to address psychosocial and mental health issues on an ongoing, book basis. Patient centricity provides education on how to successfully achieve desired performance levels and to remain in compliance with established governmental regulatory standards of practice.**

**Patient Centricity was purposely developed as a teaching tool in response to government regulatory requirements and a myriad of survey findings demanding the continuous need to improve the overall quality of care throughout the global healthcare delivery system.**

**The findings and teachings contained within this newly released guide are derived from evidenced-based research data of a twenty-plus-year qualitative study and a scholarly analysis.**

**Healthcare professionals across the spectrum of care are invited to add Patient Centricity to your resource library. Please read more about the guide at [www.patientcentricity.info](http://www.patientcentricity.info).**
