

Adon Wellness presents the best solutions for hair loss with Adonsidil Finstrong 2.5X

Adon Hair Care's Adonsidil Finstrong 2.5X. This medicine contains Minoxidil 5% and Finasteride 0.25%. While other India Minoxidil has only 0.1% Finsateride, Adonsidil Finstrong contains 0.25% Finasteride. Dr Ashok Sinha claims that if Finasteride 0.

Maharashtra, Mumbai, Jun 10, 2021 (IssueWire.com) - Hair loss is a huge cause of concern amongst Indian youth. Hence, India's one of the best online portals for all hair problems, Adon Wellness is offering a foolproof solution for all the hair-related troubles with their incredibly effective hair medicines, medicine support, and consultation. They have come up with a revolutionary new drug called [Adonsidil Finstrong 2.5X Solution](#), that offers maximum hair growth without any side effects. The portal is purely run by expert and experienced doctors who are treating hair problems all over the country since 2012. The process of procuring the medicine is done by the doctors so that the clients get the right cure for their ailment.

The problem of hair loss has increased over time all over the world. As a bald head is considered unattractive, people lose self-confidence and become depressed because of it. It leads them to try almost every method they come across. The most popular hair growing methods are hair transplant and using Finasteride tablets. Though they have shown positive results in new hair growth, they have many side effects that can hamper the user's everyday life. Finasteride is one of the strongest drugs for treating hair loss in adults. It can have a negative effect on people's sex life as it causes loss of sexual

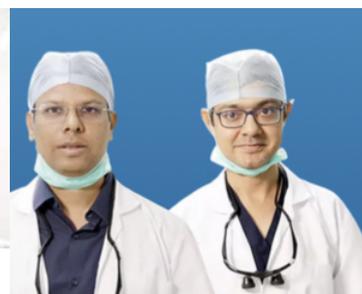

desire or erectile dysfunction. People have been seeking an alternative but there was none until now.

The company has invented the perfect solution for treating hair loss that has minimal to no side effects. One of the founders of the brand Adon Hair Care, Dr. Ashok Sinha has found the perfect replacement of the Finasteride tablet after thorough research with his team of experts. They have also made sure that no huge side-effect is related to the new medicine, Adonsidil Finstrong 2.5X. The drug is made by Follicular Technologies Pvt Ltd. And it consists of Finasteride 0.25% and Minoxidil 5%. While the other Minoxidil medications in India have only 0.1% of Finasteride, Adonsidil Finstrong has 0.25%, making it more effective.

Taking the medicine is completely hassle-free. Its medicine needs to be applied twice a day to work its magic. It does not cause a huge level of Finasteride in the blood as compared to consuming 1 mg tablet per day. It is also capable of blocking DHT more effectively. According to Dr. Sinha, only 0.25% finasteride, applied daily offers more benefits at hair growth than other side effects. Medicine is the result of years of research and hard work by Adon Wellness. Adonsidil Finstrong 2.5X causes no damage to the scalp or hair and is more efficient than all the other Minoxidil Finasteride combinations available in the market right now.

Adonsidil Finstrong 2.5X has 0.25% of finasteride instead of 0.1%, which offers more benefits and fewer side effects. Alcohol and lipid have been used in the medication as alcohol is the best solvent and vehicle for minoxidil while lipid boosts the penetration power of the drug and neutralizes the side effects of alcohol, like dryness, itching, and irritation. Other than lipid, diethylene glycol monoethyl ether is also used to make the minoxidil more penetrative. It also makes the solution stronger. The medication can easily be washed off with just water, making it convenient for daily use.

Adon Wellness is an Indian online portal for different hair problems. Founded by Dr, Ashoke Sinha and others, the company along with Follicular Technologies Pvt. Ltd has invented the ultimate solution for hair loss, Adonsidil Finstrong 2.5X. The composition of the drug is Minoxidil 5% & Finasteride 0.25 % with the power of transcutol in lipid base. It is the best treatment for hair loss and alopecia in males. The medicine is available at a 22% discount at www.adonwellness.com.
