COSTING ESTIMATES FOR DOMESTIC ANDROID APPS

The cost of developing a mobile app (for iOS and Android) is determined by your requirements, category, and other features. The estimated cost of developing a basic application in the UAE, which includes design, frontend, backend, APIs, and QA, ranges from AED 4000 to AED 12000.

As we all know, the cost of developing an app is determined by a variety of elements such as the app's functionality, the technologies employed, the app's performance, and so on. Brillmindz is a company that specializes in producing apps for both iOS and Android. All of the figures below are estimates, but they should give you a good indication of how long it will take to build your app.
