

Cavender Auto Group First to Go Green with Big Sun Solar

Iconic Texas-based Auto Dealer Invests in Sustainability

Texas, San Antonio, Jun 28, 2021 ([Issuewire.com](https://www.issuewire.com)) - Cavender Auto Group is the first auto dealer group in San Antonio to install solar carports by partnering with a local company, Big Sun Solar. The iconic auto company tapped Big Sun Solar to build and install solar carports at five of its San Antonio-area dealerships and its recently-announced Cavender Collision Center at Wetmore Road. The carports will provide Cavender's inventory of vehicles with protection from inclement South Texas weather while providing valuable renewable energy savings on their electric bills.

Cavender has been working to incorporate sustainability initiatives into its operations, and determined investing in solar energy was its next step. The decision greatly enhances the customer experience for Cavender car buyers by providing shade and decreasing the interior temperature of the vehicles during the summer months.

Installation of the solar carports is nearly complete at Cavender Buick GMC West Loop 1604 at Culebra Road. Cavender Cadillac and Land Rover San Antonio are underway, and the remaining San Antonio-area locations will follow.

The locations include:

- Cavender Buick GMC West -- 7400 West Loop 1604
- Cavender Cadillac -- 7625 North Loop 1604
- Cavender Chevrolet -- 30700 IH-10, Boerne, TX
- Land Rover of San Antonio -- 13660 West Interstate 10
- Cavender Buick GMC North -- 17811 San Pedro Avenue
- Cavender Collision Center -- Wetmore Road (opening Fall 2021)
- Cavender Grande Ford -- 4562 IH-10 East (opening TBD)

Big Sun Solar, formerly known as Go Smart Solar, has expanded rapidly since its founding in 2016 and has built more solar carports than any other company in Texas, indicating the region's increasing demand for clean energy.

Cavender Auto Group President, Bobby Cavender, expressed his excitement about the company's investment in sustainability.

"Solar carports make perfect sense for Cavender Auto Group. Their energy lowers our electric bills, they provide shade for our customers and protection from damaging hail storms," said Cavender. "We are thrilled to be the first auto group in San Antonio to embrace solar carports and we are grateful to Big Sun Solar for making it happen."

Robert Miggins, CEO, and Co-Founder of Big Sun Solar expressed his excitement and gratitude to the San Antonio businesses investing in a more sustainable community.

"The momentum to build a more green city is growing," said Miggins. "Solar has been available for many years, but with recent innovations, it has become more accessible for more people. Cavender Auto Group is one of the many businesses that are taking another step toward reducing their carbon footprint and improving the customer experience. San Antonio is a top-10 city in the United States for solar energy because its residents and corporate citizens value sound financial investments that also produce clean energy. Cavender is a shining example of this philosophy."

About Big Sun Solar

Trusted by leading brands such as Cavender, Baywood Hotels, and Rush Enterprises, Big Sun Solar is #1 in customer service for Texas businesses. While every project is designed for maximum financial returns for their clients, it's Big Sun's Net Promoter Score of 88 that sets them apart as an industry leader. They have over 45 years of combined experience in rooftop, carport, and ground-mount solar systems coupled with experience from partnering directly with CPS Energy to build 5 megawatts (MW) of community-owned solar power. For more information on the company or to inquire about solar ownership, visit www.bigsunsolar.com.
