

Cryptocurrency Startup "Veteran Token" Launches into Markets

VETERAN

Montana, Whitefish, Jun 2, 2021 ([Issuewire.com](https://www.issuewire.com)) - The cryptocurrency startup, Veteran Token, founded to support U.S. military veterans, launched on the cryptocurrency exchange, PancakeSwap, last week. Rather than launch a pre- or private sale, the Veteran Token went directly to the exchange with trillions of Binance Smart Chain (BSC) tokens available for swapping. In fact, trillions of tokens have already been swapped. The company is moving forward to list on other exchanges and coin tracking websites.

With all the craze surrounding cryptocurrency tokens and coins, the potential for massive returns is obvious, though not guaranteed. Veteran Token offers investors a way to get rewarded for supporting veterans, just by holding tokens. The more tokens that are bought, the more the company will donate to

select charities.

The Veteran Token itself is a unique token that offers a 5% reward for all holders. When investors buy into Veteran Token, not only do they buy in to show support for veterans and the sacrifices they give each day for us, but they also receive a reward for doing so. The Veteran Token also takes 5% of each transaction and adds those tokens to the liquidity pool, ensuring stable prices and an always abundant supply of tokens for transferring. 60% of all tokens were already "burned" to the liquidity pool ensuring that no one will take purchased tokens away from holders.

Interested parties can go to the Veteran Token website: theveterantoken.com to see more on the company and find direct links to invest in the cryptocurrency.

About Veteran Token:

Veteran Token is a cryptocurrency startup that seeks to be the benchmark cryptocurrency for veteran organizations and products in the United States and one that better the lives of veterans themselves. While Veteran Token has already partnered with veteran-owned organizations, ultimately, it hopes to partner with landmark veteran charity organizations so that one day the Veteran Token may be used to purchase items of real value for use by veterans.
