

Dental Views Now Offers State-of-the-Art Digital Printing

Sierraview Purchases SprintRay Pro –The World’s Most Advanced Desktop 3D Printer.

California, Chino, Jun 15, 2021 ([Issuewire.com](https://www.issuewire.com)) - In-office Dental Manufacturing has arrived. Dental Views is now able to offer patients same-day delivery of custom dental appliances—everything from dentures, bridges, and night guards to durable, high-strength crowns.

This leap forward is thanks to the Sierraview acquisition of the SprintRay Pro 95, the most advanced, state-of-the-art digital 3D printer on the market.

Patients will enjoy the convenience of having custom-made dental appliances mapped, manufactured, and fitted—often in the same visit.

That’s because each appliance is custom-made onsite.

The SprintRay Pro 95 features unparalleled advancements in 3D printing that have improved accuracy, uniformity, and speed of delivery. For instance, a new projection technology maps surfaces down to the pixel, providing a high degree of accuracy and surface quality—two important factors in the making and fitting of dental appliances. This feature is a vast improvement over previous printers.

At Dental Views, our mission is to make our patient experience as pleasant and seamless as possible. By offering same-day dentures, bridges, crowns, and night guards, we have vastly improved the quality of our patient care.

Serving Southern California and Central Arizona, The Dental Views has been offering friendly, expert dental care since 2010. With eleven state-of-the-art dental offices, the practice offers a warm, inviting atmosphere along with the latest technology and dental prowess.
