

ecadema: Resetting the Trends of Online Learning

ecadema Notches a Win, Surging as a Prominent Knowledge Economy

Pennsylvania, Philadelphia, Jun 10, 2021 ([IssueWire.com](https://www.IssueWire.com)) - Greater Philadelphia Area, East Coast, Southern US, USA, June 5, 2020, 8:00 AM

Founded in 2020, [ecadema](https://www.IssueWire.com), a pioneer in technical education, is a comprehensive online learning ecosystem providing self-paced programs and focusing on reducing the global technical skills gap.

“ A hub of Corporate Training for professional courses, ecadema platform is a real game-changer for pandemic learning “

How is ecadema helping Society?

Studies show that explosive growth in automation can cost 800 million jobs worldwide by 2025.

As rapid propagation of Coronavirus disrupts the education systems worldwide, ecadema synergistically impacts the livelihoods of affected people, by eliminating socioeconomic barriers, and helping learners to meet dynamically evolving technology-infused job trends worldwide.

Millions have been displaced, lost work, or are underemployed due to the continuing destructive effects of COVID-19.

In 2020, the e-Creators identified the prevailing challenges most organizations were facing during the pandemic: the need to transition to an online learning platform.

Therefore, ecadema took a prodigious leap in growing technology occupations like robotics, artificial intelligence, blockchain, programming, data science, data analytics, application development, accounting, and auditing, to name a few, and helping transform the human race by empowering professionals around every corner of the globe.

A world-class team of industry experts from ecadema designed industry-focused futuristic tech programs, requiring relevant skills, to make existing talent pools become more successful and transformed.

ecadema aims to educate learners to advance their professional life and make them future-ready to thrive in this progressively competitive world.

Why and how is ecadema different from the assortment of other platforms that sell recorded videos instead of living sessions?

At ecadema, we believe learning is a two-way exercise.

Connecting students to their dream courses, ecadema is opening new pathways to career-shaping programs. Digital upskilling followed by the launch of four new programs (course names to be provided by ecadema) for new high-quality work achievements have been announced, hence ecadema supports the mission of developing online learning communities everywhere.

ecadema keeps on adding new courses to its online library where students learn new skills, which ultimately makes them credibly employable in a highly competitive market.

ecadema employs video learning to deliver live sessions, live Q & A, and workshops, rather than providing recorded videos or content materials.

With an expert team of professionals, learning methods involving bite-sized learning focused on advancing practical education in the professional world through online learning.

The Numbers are worth the talking

Since the inception of our leading platform, it has trained hundreds of students and professionals worldwide.

Today, the company offers online interdisciplinary courses to professionals globally, and further plans to multiply its course offerings by 2022.

Speaking about the organization, ecadema has partnered with top-notch universities and since it has launched, ecadema witnessed significant growth in student enrollments.
