

Enter Livecounts.me - A way to view estimated YouTube/TikTok counters!

Florida, Florida City, Jun 9, 2021 ([IssueWire.com](https://www.IssueWire.com)) - When YouTube abbreviated their live subscriber counts [as of September 2019](#), it led to a great downfall of the YouTube statistics community. Even Creators back then cannot able to tell what was their live real subscriber count, it is still being rounded by three numbers as of today.

As today's technology evolves, there's one question in mind: How do we find out our YouTube live subscriber counts for each Creator? That is where one site came up with a solution, and it's called: Livecounts.me.

Livecounts.me is a free service with no ads that allows you to instantly look at your (or any users!) estimated follower/subscriber count for each Social Network! It uses its own algorithms to determine the Daily Gain Average and uses that to produce an real-time realistic counter, and even uses the network's APIs to grab the abbreviated count so there will always be accurate results. Livecounts.me is always actively developed & always the best-estimated counter site up to date!
