ExcelR Launches Data Science Course in Chennai in collaboration with IBM

Tamil Nadu, Chennai, Jun 15, 2021 (Issuewire.com**)** - **Summary:** ExcelR is finally launching its super-successful data science course in Chennai in collaboration with tech giant IBM & TCS.

Body: This era belongs to data science. From manufacturing to service-based industries, we have already seen the adoption of data science on a massive scale in the past few years. Data science is now an essential part of almost every business and organization. With the help of data science, companies can easily predict and solve various problems like an upcoming dip in sales or market & how you will tackle that. And help businesses make optimized decisions. All these predictions are made on the basis of data. Data is the backbone of whatever you do in data science.

With the rise of the internet, data consumption, as well as production, is continuously increasing, and if you look at it from the business perspective, this data can be used to help the business economy in many ways. Every company out there wants to use this data to make itself more profitable. So, the demand for professionals who can play around with this data, aka data scientists, is also increasing considerably. With all these contemporary phenomena, Data Science has become the most in-demand & high-paying job of this time.

Harvard quoted data science as the hottest job of the century, which will dominate any other job in terms of pay as well as challenges.

So, who would not want to step into data science? The payscale is sky-high, demand is huge, and the job is as reputed as high-table professionals. But is it easy to become a data scientist? Well, the straightforward answer is NO! It's not! On top of it, the competition is continuously increasing in India, and it's becoming more & more tough to crack a data science job.

ExcelR Solution, one of the most prominent Data Science institutes in India, has launched a course on Data Science in collaboration with IBM.

ExcelR wants to empower all aspiring data scientists by strengthening their concepts and giving them the right training with proper support. ExcelR provides an excellent opportunity for participants to hone their skills to the fullest.

ExcelR strives to provide top-notch training to its participants. Their trainers are global industry leaders with decades of experience. One of the higher officials of ExcelR stated that "Providing a [Data Science course](#) to empower data science enthusiasts seems more realistic and optimistic in the current scenario, and they were waiting for the perfect opportunity to launch the course." Collaboration with IBM seems to be the perfect opportunity to launch the [Data Science courses](#).

ExcelR has made sure that the [data scientist course](#) includes everything from top to bottom and all the existing and developing technologies used by Data Scientists worldwide. The course is designed in such a way that even a beginner can quickly grasp the concepts. The course is both for freshers as well as veterans. The case studies and projects included in the course are an added advantage and prepares the participants to face the real-world problems of data science.
