

ExcelR Launches the PMP Course in Compliance With PMI's New Exam Format

Karnataka, Bengaluru, Jun 15, 2021 ([Issuewire.com](https://www.issuewire.com)) - ExcelR Solution, a premier [PMP training](#) institute headquartered in the USA with a franchise network in major cities in India and worldwide, has launched a new edition of its PMP course to align with the new PMP exam format. With this new edition, you can work smarter and gain a competitive edge as PMI remains the top project management certification globally.

The PMI, with its regular surveys and research, decided to make some changes to the exam patterns based on emerging trends to make them more robust and relevant to the new generation of project managers. Accordingly, PMI released the new PMP exam content on 30 June 2019 and announced that the last day to give the old version of the exam was 31 December 2019, and the first day to take the new version is 2 January 2021.

The Exam Content Outline (ECO) to the older version focused on five performance domains: Initiating, Planning, Executing, Monitoring & Controlling, and Closing. In contrast, the newest edition concentrates on three primary performance domains: People, Process, and Business Environment. Despite being radical, the latest outline is a valuable departure from historical versions of ECOs.

There are now 50% more agile questions in the exam pattern, adding more weight to agile concepts. However, from 200 questions to 150 questions and the reduced time duration from 240 to 230 minutes, the prerequisites remain the same as earlier.

Taking everything into account, ExcelR Solutions, one of the leading training institutes, made necessary changes to its [PMP course](#) curriculum, trained its faculty members to the upgraded edition, and relaunched the newest edition of PMP certification. The course focused on agile methodology, three performance domains: People, Process, and Business Environment, with more questions on these modules to cater for the best training in the industry.

ExcelR Solution is a certified training institute bearing a registration number as "4636" for [PMP Certification](#) education provider, under the Project Management Institute (PMI), USA. With 3000+ questions and 5+ simulated tests based on exam patterns, ExcelR makes sure you crack the certification in the first attempt with pre-planning and four days of exclusive training from experts having 17+ years of experience.

Get lifetime access to self-paced learning and a hike up to 20% in your current salary, which opens many doors and opportunities for you. Take advantage of this course from the office or at home, joining ExcelR Solutions for the best [PMP certification in Bangalore](#) at the best price in the industry.
