

Give Love a Shot with Vaccidate Dating App Developed Specifically for Vaccinated Users Only!

How does anyone really know who is vaccinated in the dating world?

Vaccidate

GIVE LOVE A SHOT

Illinois, Chicago, Jun 3, 2021 ([Issuewire.com](https://www.issuewire.com)) - Vaccidate is a social website & app software specifically developed for the online dating community. Vaccidate offers a sense of relief for vaccinated single adults looking to date other vaccinated single adults.

As part of the company's mission, the app offers a place where users in the dating community can feel

assured knowing that the single adults they choose to date are vaccinated and verified through the Vaccidate registration and verification process. Vaccidate's focus is to become the standard for the vaccinated online dating community and to provide a sense of relief for those still looking for love during these trying times.

Our mission is to create more awareness on the seriousness of virus infections while giving back proceeds to help researchers, and families suffering from COVID-19 amongst other viruses. To do this, a percentage of proceeds will be donated to CDC- approved websites. Quarterly donations will be made to CDC recommended foundations to help families and victims suffering from virus infection and more.

Registration requires that users upload their identification documents, vaccination card, and live selfie to the site or app. Profile approval could take up to 24 - 48 hours to verify vaccine information. We are taking proper measures to ensure all data is protected.

Steps to Register :

- Upload your ID or driver license
- Upload your vaccination card
- Upload a live selfie of your face while holding your vaccination card
- Upload your profile avatar image
- Wait 24-48 hours for approval

Level up Private Messenger - Earn New Ways to Communicate:

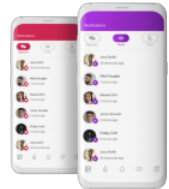

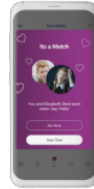

Vaccidate Level Up Private Messaging system was developed to make sure that there is a connection between users before allowing them more options to communicate further with each other. The proprietary 5 levels messaging system makes sure each user is finding a true connection with others who have similar real-life interests. All free users earn access to the level-up features in each separate private messaging chat. This could lead to true connection and real-life dating scenarios.

Additional site features:

- Profile vaccination badges & QR identification codes
- Boost for popularity
- Hot or not easy profile matching
- People I Like, People I Dislike
- Messenger Gifts & Stickers
