About Stackground

Brex is transforming the way headless CMS websites are developed by creating prebuilt templates built using headless CMS and ReactJS based static site generators like Gatsby and Next that are tailored to meet the website requirements of all the industries. In 2020 Stackground launched the [prebuilt jamstack templates](#) to build no-code websites using headless CMS. The product was initially designed using Gatsby by providing more than 100 themes falling under more than 30 industrial categories to meet the needs of every business and individuals like e-commerce, SaaS, technology, startup, corporate, multipurpose, blogs, etc. Stackground is able to reimagine every aspect of website development, including design, development, stack, customization, and performance to create a radically better experience for customers. The company's headquarters are in San Francisco.
