

Magento New Extension Release for Restrict customer login

Magento Restrict User Extension Uses

Delhi, New Delhi, Jun 21, 2021 (Issuewire.com) - Purpletree Software, the most reputed organization for Magento and opencart extension has launched a new Magento extension called [Magento Restrict extension](#), this extension is helpful in restricting/block those customers who are not good for your business in a way and you can block them very easily after integrating and installation on Magento website,

The installation and operating of this extension is very easy, you can get more details regarding operating and installation here, In this article, we are discussing why we need such Magento to restrict extension on our website, we have discussed some very important points why we need such extension, lets study below points:

Restrict Spam users

It is very useful in restricting spamming users if you identify them as spamming is very harmful and eradicate your positive of business in negative terms in many ways like, they might order products in bulk and stopping other customers to purchase then eventually can ceiling the order this is very cost poring work on the business, this is just an example there are many ways in which spamming customer has a negative impact on business.

Restrict bully users

Some customers get a habit to bully the seller, this also has a very negative impact on business, so if you want you can restrict the bully customers in a very easier and simpler way, thus helping you a lot in

meeting your targets and get away from bully customers easily.

Restrict habitually “cancelled order” users

Some customers are habitually undecided and get cancelled the order before purchase and after purchase and asking for refunds, this is very helpful in handling this type of customers, you can very easily get restrict those habitually cancelled order customers and do your business more efficiently and properly. It will greatly help in reducing the cost of handling those orders that can eventually be cancelled after some time.

Restrict Support team Spammers

Magento Restrict user login extension is also very useful in restricting those customers those are support team spammers, they kept on asking useless questions, by the way, we fully support questions, it should be asked again and again but those asking irrelevant questions and somewhere giving a hint that they are not interested in purchasing but only asking questions can be restricted very easily using the extension.

Restrict some unauthentic businesses

With Magento restrict user extensions you can easily restrict those persons who are not at all interested in purchasing of product but interested in getting your idea of a sale, you can restrict those users, and get kept your idea of the sale away from those unauthentic persons, they can also be very helpful in keeping your idea of offers, product development, etc. related to you very easily.
