

Meet the Nurse Helping Hundreds of US Women & Men Get Their Cash and Confidence Up

This was definitely life-changing for her and her family.

California, Los Angeles, Jun 15, 2021 ([Issuewire.com](https://www.issuewire.com)) - One in three Americans have a side hustle and more than 61 million Americans plan to start a side hustle this year. This trend is expected to continue to grow as more people seek to create passive incomes that allow them to retire early, save for large purchases, pay off debts, and more. However, the motivation isn't always a financial one. Reports show that some people choose to start a side hustle to test out a new business idea, for something to do, or to learn new skills, but for Titia Widener-Williams it was all of the above.

A wife, mother of one, and a Registered Nurse (MA, BSN, RN, CNOR) with multiple degrees in Political Science, International and Comparative Politics (ICP), and Nursing. Titia Widener-Williams has always been someone who knows what she wants and knows how to get it! A member of Alpha Kappa Alpha Sorority Incorporated from Cleveland, Ohio, Titia has never allowed fear of the unknown to stop her from pursuing opportunities. So when a trusted friend told her about a new ground-breaking business opportunity that was changing her life, Nurse Titia was definitely here for it.

Titia was still new to Atlanta, a new mother, a new wife, and suffering from post-partum. She wanted to do something that would allow her to get out, meet people, and make money. Until then, she had no idea that this opportunity even existed. She joined immediately and sold out of her starter kit the very same

day. By the sixth month, Titia was blown away at how much money she was making all while doing something she really loved. She was attending various events, meeting all sorts of different people, and looking great while she did it. Her confidence was through the roof! This was definitely life-changing for her and her family.

Today, Titia is one of the top-selling sales execs for one of the jewelry industry's leading companies. Her inventory is second to none as she possesses one of the largest and most diverse selections of jewelry for her customers to choose from. She has helped more than 1200 women and men who have joined her team earn an extra income, pay off bills, take luxury vacations, gain confidence, and more. Her mission is to help 1200 more women and men do the same.

"Many people look at MLM businesses negatively, but I've found it to be a great business model. The business is pretty much already set up and just waiting on you, you always have support, very low investment, and high commission payouts. What else can you ask for?" she asks. "I mean right now, I make enough where I could quit my full-time job as a nurse and still pay off all of my bills with the commissions I make. However, I'd rather retire early with riches. Before I started with this business, I didn't see myself retiring until I was in my 60's, with this opportunity I see it happening within the next 3-5 years" states the sales tycoon.

Titia is looking to grow her team and help more men and women get started with their jewelry business. Her company pays one of the highest commissions in the industry. You can even earn luxury vacations and free jewelry for reaching sales goals. The business is already set up and just waiting for you.
