

Metallic Stearate Market Report 2021, Industry Analysis, Trends, Share, Size, Growth and Forecast 2026

New York, New York City, Jun 29, 2021 ([Issuewire.com](https://www.issuewire.com)) - According to the latest report by IMARC Group, titled "[Metallic Stearate Market Size: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)" provide the global metallic stearate market exhibited moderate growth during 2015-2020 and expects the market to grow at a CAGR of around 5% during 2021-2026. The report provides a detailed analysis of the market by region, product and application also, the report analyzes the market's competitive landscape.

Report Metric

Historical: 2015-2020

Base Year: 2020

Forecast Year: 2021-2026

Metallic Stearate Market Industry Definition and Application:

Metallic stearates refer to compounds of long-chain fatty acids with various metal valences, such as calcium, zinc, aluminum, magnesium, etc. They are usually available as pastilles, pellets, flakes, granules, fine powders, etc., with high surface area. Metallic stearates are primarily used as lubricants, acid scavengers, release agents in plastic products, etc. They act as suspension agents during the manufacturing of waxes and liquid wax compounds. Their release properties, gelling capacity, and thixotropic effect are advantageous in the pharmaceutical industry for tablet pressing.

Note: We are regularly tracking the direct effect of **COVID-19** on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Metallic Stearate Market Trends and Drivers:

The increasing product utilization in several end-use industries is driving the metallic stearates market. For instance, they are used in the textile industry as antistatic agents for dry impregnation. Furthermore, metallic stearates are also used in printing ink works as suspension and swelling aids for additives such as pigments. Additionally, they are added to personal care products and cosmetics, such as shampoos, lipsticks, medicated ointments, etc., to prevent these products from forming agglomerates or absorbing water. The rising expenditure capacities of consumers and elevating levels of beauty consciousness are catalyzing market growth. Besides this, numerous key players are developing thermostable metallic stearates, which are resistant to discoloration when used in brightly colored or transparent thermoplastics at high processing temperatures. These advancements are anticipated to fuel market growth in the coming years.

Metallic Stearate Market Segmentation:

The report has segmented the market on the basis of region, product, and application.

Breakup by Product:

- Zinc Stearate
- Calcium Stearate
- Aluminum Stearate
- Magnesium Stearate
- Others

Breakup by Application:

- Plastics
- Rubber
- Pharmaceuticals
- Cosmetics
- Building and Construction
- Paints and Coatings
- Others

Breakup by Region:

- North America: (United States, Canada)
- Asia-Pacific: (China, Japan, India, South Korea, Australia, Indonesia, Others)
- Europe: (Germany, France, United Kingdom, Italy, Spain, Russia, Others)
- Latin America: (Brazil, Mexico, Others)
- The Middle East and Africa

Who are the Major Metallic Stearate Market Key players?

The report provides a detailed analysis of the market leaders, including.

Baerlocher GmbH, DAINICHI CHEMICAL INDUSTRY Co. Ltd., Dover Chemical Corporation (ICC Industries Inc.), Faci S.p.A., James M. Brown Ltd., Nimbasi, Norac Additives LLC, Peter Greven GmbH & Co. KG, PMC Biogenix Inc., Sun Ace Kakoh Pte Ltd, Univar Solutions Inc., and Valtris Specialty Chemicals.

About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic, and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology, and novel processing methods are at the top of the company's expertise.
