

Pacetrail Aims To Launch The Worlds Thinnest Cellular Trackers

California, San Francisco, Jun 27, 2021 (Issuewire.com) - Pacetrail will be launching the **worlds thinnest cellular pet tracker** created for small and large pets, which is rich in features like Geo-fencing, Live Tracking, Wellness and Activity Monitor, SOS and On-Demand Tracking. The devices have a truly global range powered with next-generation LTE-M & NB-IoT Wireless technologies and can achieve impressive accuracy indoors and outdoors using proprietary DSP technology developed by

Pacetrail.

IDEAL FOR SMALL, MEDIUM AND LARGE PETS.

Most pet trackers available for purchase are often too large for small or medium-sized dogs or cats. The [Pacetrail](#) Global Pet has an impressive size of 35x35mm and a thickness of just 8.95mm making it more comfortable and easier to wear for a longer duration.

LONG LASTING & RECHARGABLE.

The [Pacetrail](#) Global Pet Tracker lasts 3+ months on a single charge on low power 'on-demand tracking mode' so that you don't have to take out time every week to charge it. The Trackers are designed using low power algorithms that put the device into sleep mode when there's no activity. Despite monitoring a range of behaviours or tracing your pet's location, these devices run complex power-saving network configurations like eDRX, PSM and LTE-RAI to save energy and make sure their charge lasts as long as possible.

Pacetrail CTO Jeff Hammond affirms that "We know how distressing it can be to lose something important to you, no matter how big or small. Our smart technology makes tracking easier than ever before, offering meticulous accuracy and in-depth data analysis." and believes Pacetrail intelligent devices are the perfect way to monitor detailed insights, straight from your smartphone.

The Trackers are expected to launch in Mid July 2021 on Kickstarter and will be available for shipping in December. The Company has started an extensive Pre-Launch campaign to attract and gather support. People and community members who are interested in getting special secret Exclusive deals have a few weeks to register on the website [Prelaunch](#) page.
