

The First 25A 5500W SONOFF High Power Smart Switch is Launched on ITEAD STUDIO

Guangdong, Shenzhen, Jun 25, 2021 ([Issuewire.com](http://www.Issuewire.com)) - Today, ITEAD STUDIO launched the first 25A 5500W SONOFF high-power smart switch.

The POWR3 is powerful enough to act as a smart meter for a single room, connecting all the appliances in the room to the POWR3 and the power consumption of each room is counted individually, budget your smart home. Moreover, POWR3 will keep the consumption data for 100 days, which can be exported to CSV on your phone. SONOFF POWR3 smart switch can connect to the free eWeLink APP to let you manage. Multiple POWR3 can be controlled centrally, and the metadata and power consumption can be displayed on Hass through the eWeLink add-on. Track and schedule all of the connected home appliances remotely from your smartphone, and synchronizes the switching status, wherever you are. Compatible with Amazon Alexa and Google Assistant, SmartThings, and Alice, home appliances are convenient to control with your voice.

SONOFF POWR3 smart switch is designed with the function to prevent damage to the connected home appliance due to overcurrent and overvoltage, assuring an added peace of mind for homeowners. You can set the threshold including power, voltage, and current for your high-power home appliances connected with POWR3 to allow it to automatically switch them off when the set value is reached. No more fire risk occurs in your smart home.

The following characteristics and features are available in SONOFF POWR3:

CE, FCC certificated

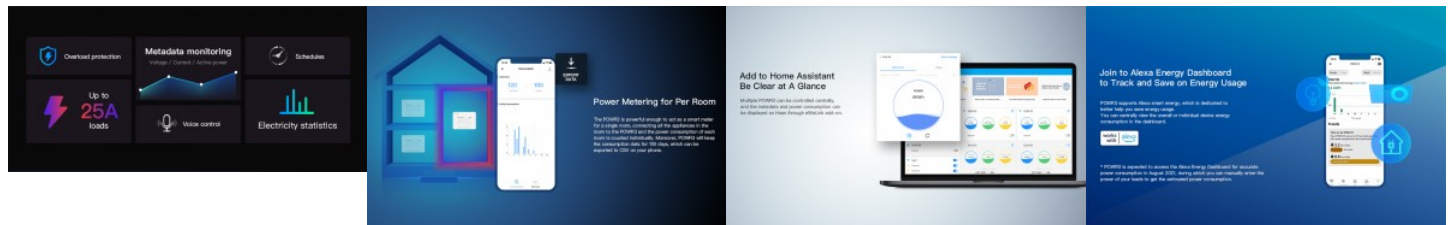

- Over-load protection
- Power Metering for Per Room
- 100-day historical power consumption record.
- Remote control (eWeLink APP)
- Voice command (works with Alexa, Google Assistant, SmartThings, and Alice.)
- Timing function (single/countdown/loop timing)
- Smart scene (trigger a group of home appliances on/off)
- Sync device status
- Share control
