King Of NFT Is Coming - EXZIE CRYPTOCURRENCY

London, Greenwich, Jun 30, 2021 ([IssueWire.com](https://www.IssueWire.com)) - [Exzie](#) is the largest gathering of Entertainment Executives in the world. [Exzie](#) is a platform that allows creative content owners access funding for their completed creative works, by leasing the copyright to their Music, Movies, and/or eBooks for a duration, and at a fee. For the first time, investors and especially fans can get to own a share of creative content they love. Content owners get paid, Executives get paid, everyone stays happy.

In the words of Dipo Adagbada, the CEO of [Exzie](#), 'Exzie ensures transparency, mass distribution of content and communal relationship of all stakeholders inward in putting a creative content together. Exzie makes use of the latest technologies such as Blockchain, 5G connectively, Augmented Reality, and Virtual Reality in creating, promoting, and delivering entertainment in a way that has never been imagined. Exzie is a dream that is six years old, and our concern has always been about using technology in a fair manner to help the underserved.'

Exzie solves numerous challenges faced by artists. For instance, Exzie makes funding easily accessible to upcoming artists to produce their songs or album by giving fans a chance to invest in the work of their favorite artist and share in the royalty from such work. [Exzie](#) also eliminates middlemen in the supply chain through direct-to-consumer D2C relationships between creators and their fans thereby increasing the revenue share of the creators. Through its smart contracts, blockchainExzie makes sharing of revenue fairer based on predetermined agreements.

Exzie is the king of NFTs, and this is because it is taking entertainment to heights never imagined and running all of these using the Blockchain framework, alongside the latest technologies.
