

UNSTOPPABLE FINANCE: A New Cryptocurrency Seeking to Combine The Stock Market and Crypto.

Germany, Berlin, Jun 9, 2021 ([Issuewire.com](https://www.issuewire.com)) - UNSTOPPABLE is a brand new cryptocurrency, started a mere 2 weeks ago, that has some bold yet attainable goals set for its near future. They are focused on creating a platform that will combine stock trading and cryptocurrency trading on a single network. A platform that could combine the [investment opportunity](#) of the cryptocurrency world with the stability of the stock market would be a major breakthrough in both Wall Street and the blockchain world. This platform is currently in development by the team and is the main priority for now. After this platform is launched, the team has plans for future NFT projects and platforms along with other future developments.

What is UNSTOPPABLE'S Mission?

A single exchange where cryptocurrency and stocks can be traded would truly be something unique and more importantly, useful in this world. It would allow ease of access for new traders on both ends to get their feet wet in either world and learn what trading in something new would be like while still having the familiarity of what they know on the same platform. These things take time, but the team is hard at work on developing this platform and once it is launched, it could be something truly special.

Dedicated Funds and Tokenomics

Unlike other new projects that refuse to dedicate funds to marketing and spreading the news about their project, [UNSTOPPABLE](#) has a wallet that is dedicated specifically for this purpose. It is funded continuously as the tokenomics continue to play out and will allow for larger and greater marketing partnerships and projects in the future as the token continues to grow.

Transparency and Liquidity Lock

UNSTOPPABLE has been transparent and honest since launch about how the tokenomics work and what each wallet involved is used for. There is a wallet dedicated for marketing, the burnwallet, all of the community's wallets, and Luca himself has made public his wallet so as to be as open and transparent with the community as possible.

The liquidity has also been locked away for 4 years as another show of transparency with the community. The dxsale link will be provided below. All of these aspects and the fact make the community feel welcome and safe in their investment in this project's future and potential.

What's Next for UNSTOPPABLE?

UNSTOPPABLE is moving fast and the wheels are starting to turn on this project's potential. Along with this, they are going to be establishing their places on future exchanges and developing multiple avenues for future investors to get involved in the project. This project is brand new and at the absolute ground level when it comes to investing. With a promising future and dev team behind it, UNSTOPPABLE is poised to break out in 2021. Now is the time to get involved while it is still beginning to get the ball rolling.
