[Medeil Cloud Platform](#)

Recently we launched our Medeil-Cloud Platform to expand our capabilities to address the specific industries complete demand from Manufacturer, Warehouse management, Distribution management software, multiple stores of pharmacies, and retailers, even more, we can reach the final customer in the single cloud application or even we have a solution to discuss individually both cloud and mobility enabled solution, our experience through a lesson about pharmaceutical verticals over 12 years, we aware about country-specific own regulatory compliances requirements also have different in several factors such as Insurance Integration, Taxation system, Brand information, etc.

Medeil-Cloud Apps are supporting Multilingual such as English, French, Arabic, and Spanish, Plan to reach a global market for addressing their business demand of software, we launched recently Medeil Cloud POS in India, UAE, Saudi Arabia, Qatar, and Kenya. We will expand to other countries in few months which includes Europe, North America, Canada, and South America. We plan to adopt local government norms and approvals to accept each and every country.

Medeil cloud HQ for a chain of Pharmacy solution, Hosbay, Medorbits, Allotmed, and Cartfil is ready for all countries, Medeil Plus Cloud is launching in a month as a SaaS application targeting medical practitioner, Clinic, and Hospitals

About Vanuston:

Vanuston Intelligence, a privately held firm providing high-quality software as a Service (SaaS) Application for Healthcare and Retail business solutions in selected vertical segments by combining the domain expertise, process-driven technology skills, and a commitment towards long-term client relationships.

Founded in 2009 by a team of experts, Vanuston Intelligence has been dedicated to delivering cutting-edge solutions to Independent Healthcare professionals, corporate, and medium and small business owners.

Our customer-centric approach turns apart from the competition by focusing on individual services rather than mass-produced which includes custom development, updating legacy systems, implementation, and consulting support to build a client-specific system. For more information
