

Working At Heights? StopDrop Tooling Got You Covered

StopDrop Tooling provides best tool box And kits for working at heights.

England, Dewsbury, Jun 22, 2021 ([Issuewire.com](https://www.issuewire.com)) - Working in heavy industries and construction sites can be a hazardous job and dropped objects are one of the primary causes of accidents in these areas.

In the drilling industry, it has been estimated that one in ten dropped object incidents occurs due to falling hand tools.

Specifically, mentioned as height tools, tools aloft, or tethered tools, [StopDrop Tooling](#) has been designing these tools to avoid dropping when working at heights.

They believe that by properly securing the hand tools to a rigid place and using locking techniques for individual tool parts, dropped objects incidents can be avoided.

Dedicated to reducing dropped object incidents on and offshore, StopDrop Tooling is a member of the drops workplace organization manufacturing tools that drop compliant.

They are associated with their customers globally, ranging from drilling contractors, rope access specialists to scaffolding companies.

Their standard derrick tool kit known to be the finest full derrick kit available has been delivered worldwide for over a decade and its components are continually worked upon for further advancements.

They also provide a kit design service for both static and mobile kits, meant for a specific job or work area. All you need to do is to pick the individual tools you need, and StopDrop Tooling will manufacture the best bespoke kit.
