

Abraham Jacob, MD, an Interventional Cardiologist with Preventive & Therapeutic Cardiovascular Associates, PLLC / Heart

Get to know Interventional Cardiologist Dr. Abraham Jacob, who serves patients in Plano, Texas.

New York, New York City, Jul 15, 2021 (IssueWire.com) - Dr. Jacob, a reputable interventional cardiologist, is the Founder of Preventive & Therapeutic Cardiovascular Associates, PLLC in Plano, Texas.

Truly caring about his patients and making a difference in their lives, he takes the time to not only listen, but to understand their situation and lifestyle. Patients of PTCA Cardiology are fortunate enough to know that Dr. Jacob is a rare find and someone who is genuinely concerned about their welfare. Not only is he one of the Country's leading cardiologists, but he has also cultivated a medical staff that shares his vision and values. They work seamlessly to provide the most rewarding patient experience possible, maintaining an efficient operation and fostering an atmosphere of care and compassion.

Realizing his passion and commitment to their medical care, patients of Dr. Jacob enjoy his calm demeanor as well as his vast knowledge and experience when it comes to treating simple to complex patients.

His experience and knowledge base allows him to take care of patients with chest pain, palpitations, CHF, various arrhythmias including life-threatening arrhythmias, peripheral arterial disease, and valvular heart disease.

Heart and Vitality, PLLC was also created by Dr. Jacob, fueled by his passion for helping his patients live healthy, productive lives. It is that same compassion and drive that is permeated throughout the entire staff, and working together, they have been able to create customized programs for patients that are fast and effective.

The premier Hormone Replacement Therapy Center located in Plano, Heart, and Vitality, PLLC specializes in testosterone replacement therapy for men and hormone replacement therapy for women. Its unique approach attacks aging and disease prevention from multiple angles, giving patients a complete solution and a better chance of living a longer, healthier life.

At a very early age, Dr. Jacob was aware of the life-saving benefits of medicine, inspired by his father's work as a pharmacist at a local hospital in India, where he was born. It was then that he realized his desire for helping people through medicine, and set him on his path to making a difference in people's lives.

At the age of 12, his family moved to the United States, and by the age of 15, he joined the workforce, learning to manage school, work, and sports. He initially entered the medical field as a pharmacy technician, and his fascination with medications and their benefits propelled him to begin his pursuit of becoming a doctor. He ultimately chose cardiology because it was innovative and ever-changing, offering more opportunities to not only save people's lives, but to change them for the better. He went on to complete his medical internship, residency in internal medicine, and fellowship in general cardiology at the University of Kansas in Kansas City in 2001, completing his final year of training in interventional cardiology with a private group doing business as Iowa Heart, P.A. at Mercy Medical Center in Des Moines, Iowa.

Certified in age management medicine, he is also board-certified in cardiovascular disease by the American Board of Internal Medicine (ABIM). The ABIM is a physician-led, non-profit, independent evaluation organization driven by doctors who want to achieve higher standards for better care in a rapidly changing world.

Specializing in preventative, nuclear, and interventional cardiology, Dr. Jacob is a partner of The Heart Hospital Baylor Plano. He is also on staff at Baylor Regional Medical Center of Plano, Baylor Medical Center of Carrollton, Medical Center of Plano, Dallas VA Medical Center, and First Coast Cardiovascular Institute.

In addition to being a Fellow of the American College of Cardiology, he is a member of the American Heart Association.

Interventional cardiology is the subspecialty of cardiology that deals specifically with the catheter-based treatment of heart diseases. The field includes the diagnosis and treatment of coronary artery disease, vascular disease, and acquired structural heart disease. An interventional cardiologist is a cardiologist with one to two years of additional education and training in diagnosing and treating cardiovascular disease, as well as congenital and structural heart conditions through catheter-based procedures, such as angioplasty and stenting.
