

Accelerate The Gig Economy Revolution With UNILYSIS UNLT BNB

\$UNLT presale begins on July 15th as the UNILYSIS (UNL) BNB Platform goes live by year-end

India, Delhi, Jul 21, 2021 ([IssueWire.com](https://www.issuewire.com)) - The gig economy has been centralized for far too long, and crypto tokens have little real value to freelancers. It's high time we changed that, and that's exactly why UNL is here. It's more than your average crypto token. [UNILYSIS UNL](#) is meant to revolutionize the gig economy – a disruptive crypto ecosystem to support students by decentralizing the gig marketplace. It seeks to make crypto transactions more accessible, secure, and economical for students paying their fees online and purchasing courses online with our platform. You can get your first token on the Presale beginning July 25th, 2021.

The idea is to disrupt the gig economy by providing a marketplace where buyers and sellers can directly engage in a decentralized network. It is to be powered by crypto capital, i.e., users can create and trade their crypto capital. For each transaction, crypto rewards can be earned. Tokens can be swapped for UNLT, cash, or any external exchange. It will increase accessibility by dialing down the platform and cutting the transaction costs from the usual 20-25% to 2-3%. In short, the UNLT ecosystem will make crypto tradable for real value.

The Decentralized Exchange system, called UNLT, is set to go live by the last quarter of 2021. Once online, this system will utilize UNLT and other crypto trade to funnel money into the gig ecosystem envisioned to provide full-time benefits to gig workers. What the gig market fails to do presently is translate full-time benefits that most gig employers have into full-time yields for gig workers. Donating 5% of the total platform fee to the UNLT Blockchain for Students Economy, UNLT will serve the purpose.

With a workable product on the table and having a 50% higher mining rate than a life coin, UNLT Blockchain is set to revolutionize the gig economy. It's a decentralized ecosystem that will empower students and ultimately shape the future of UNLT.

The gig economy disrupted the conventional marketplace. It's time to disrupt its centralized system for the rideshare economy and other freelance services to empower the gig workers. Degecoin Blockchain is here to make that happen. *Mine is a secure gig future with UNLT today! Make cryptocurrency tradable for real value!*
