

## ACETO is offering a new GMP Packaging service With Acquisition of A&C

A&C is a service driven organization finding unique solutions to our customers' GMP challenges.

North Carolina, Raleigh, Jul 19, 2021 ([Issuewire.com](https://www.issuewire.com)) - ACETO provides specialty materials for advanced technology and life sciences and recently, A&C has announced that they will offer a new [GMP packaging](#) and repackaging service. GMP stands for Good Manufacturing Practice. A&C will offer lots of Good Manufacturing Practice formats that meet the EU and FDA packaging requirements.

With the help of Good Manufacturing Practice ingredient manufacturing, development, and packaging in the life science part, ACETO will solve consumers' regulatory challenges and technical products. The Good Manufacturing Practice packaging can be modified to consumers' batch-specific container sizes for powder and liquid raw materials. In production areas, the GMP repackaging ingredients are appropriate for the consumers.

The range of packaging formats is from 100 mille liter to 1000 liter and contains plastic drums HDPE, phenol resin lined steel drums, clear and amber glass bottles, stainless steel drums, intermediate bulk containers, and single-use bioprocess bags. To help consumers secure and optimize critical supply, it offers to consumers an extensive selection of competitively priced and highest quality services and products respectively.

A&C offers multiple other services, such as GMP custom ingredient development service, GMP custom manufacturing service, and many more. The A&C has been offering these services for a long time. To get these services from A&C, customers easily can contact A&C by visiting their official website, or by calling or email.

## About A&C

A&C is a worldwide Good Manufacturing practice company of practice solutions, buffers, and a number of APIs (active pharmaceutical ingredients). Since 1966, the services related to life science have been providing by the A&C and A&C gets successful to expand A&C globally in that time period. In North America and Europe, many GMP production facilities and offices are established these days.
