

Believe in Youth By Rishabh Mukati

Risbabh Mukati Believes in youth

A brave, frank, clean- hearted, courageous and aspiring youth is the only foundation on which the future nation can be built.

Madhya Pradesh, Bhopal, Jul 9, 2021 ([Issuewire.com](https://www.issuewire.com)) - If you don't know about Rishabh Mukati then here are some key highlights about him. Rishabh is an Indian Politician, social worker, and Writer from Bhopal. He is a member of the Bharitya Janta party and A New Awakening of Indian Youth Politics. He advances the ideals of nation-building, patriotism, national development, and is a follower of Swami Vivekanand's wise words, applying them to life. Since childhood and schooldays, he had joined the Rashtriya Swayamsevak Sangh as part of the Swayamsevak where he was exposed to its national

ideology and became dedicated to his nation's progress. He is a member of the BJP with strong social involvement in Bhopal city.

Rishabh Says "I learned not just how to talk about ideas, but how to put them into action. It's not just about what we can do in high school, but to enrich our entire city. Our Tomorrow helps us have those conversations with leaders — and they're listening."

Youths are the backbone of a community. They are the promising dreamers possessing incredible potentials that could be transformed into a tangible accomplishment. Encouraging them with constructive motivation can extend hope and could illuminate their future outlook towards the world.

However, most young people are prone to get demotivated these days due to mental pressures relating to society, academic and personal issues, etc. Younger folks can easily be entangled within fears that can shatter their future. This is one of the main reasons behind the youth not being sometimes bold enough to take on new ventures. Let us believe in youth, girls, and boys who can make a difference in the world. Let us work to the best of our abilities, with a good heart, and exceed our own expectations. Let us live our values and empower our young people so that they can lead us into the future. We believe it is critical that young people have opportunities to find, develop, publicly present, and intentionally apply their voices. Silence is a powerful thing when chosen, but incredibly oppressive when forced upon. I challenge young people to find their own voices, to work hard to apply them, and to do so responsibly. We ask youth to not be afraid of their own potential; we promise them we won't be.
