

Cedar Aviation inc Aircraft Maintenance Now At Mirabel Airport Services provided to Cessna Planes

Quebec, Mirabel, Jul 20, 2021 (Issuewire.com) - Cedar Aviation inc. is a Transport Canada Approved Maintenance Organisation (AMO #20-18) situated in Mirabel airport, Quebec. We offer both routine & specialized maintenance on a variety of light piston airplanes. Our TC approval is testimony to our high degree of professional standards with regard to aircraft maintenance. We are consistently audited to maintain these high standards & adherence to the Canadian Aviation Regulations (CAR). Our Scope of work spans our abilities to perform normally scheduled inspections in accordance with the manufacturer's recommendations & customers Approved Maintenance Schedules (CAR 605-86) as well as to perform major modifications and repairs (i.e., sheet metal). Our avionics department can expediently conduct avionics troubleshooting and biennial tests and inspections as well as carrying out communication and navigation equipment installations. We are also able to perform many of these tasks off-site at the customer's local. Our professional staff has years of aviation experience in many domains and facets of aircraft repair and maintainability. We maintain an up-to-date technical library for a variety of aircraft as well as keeping a constant liaison with the manufacturer's technical support representatives and teams to supplement our knowledge to have up-to-date information. Our prices are highly competitive and even have flat rates on most general inspection criteria (i.e., annual inspections). We can even offer 24/7, AOG (Aircraft-On-Ground) support.
