

China Aipack, Leading Manufacturer of airless pump bottle release new cosmetic packaging bottle

China cosmetic container factory Aipack new airless bottle release

Georgia, Clarkston, Jul 7, 2021 (Issuewire.com) - Aipack, the leading manufacturer of [airless pump bottles](#) is pleased to present the newest range of cosmetic bottles in trendy designs. AS is considered to be an ideal material for airless bottles. They are manufactured with a different technique which involves the transformation of plant material into the most durable material. Most designer brands use this material to design their packaging containers. Aipack is one such brand that is committed to offering the

best plastic airless pump bottles for its customers. Most people prefer these bottles because they are very easy to spray and noble as well. They can be refillable after use out. Most dust and grim can be removed by running the frames under warm water.

All the products are manufactured in an in-house [cosmetic container factory](#). The R&D team at Airpack is known for launching 20 new models every year. All their new launches are displayed at the Canton Fair, Hong Kong Fair, and Mido Fair every year. For customers who wish to see the product range are always welcome to visit the factory. The AS plastic airless pump bottles are hypoallergenic which means they are safe for prolonged usage. They are light in weight, flexible, durable, and make good investments. Ideally, an airless bottle can help the customers use our cosmetic cream 100%, it has no waste, which means not waste money. And that is why they remain the popular choice in the cosmetic packaging industry.
