

Edwin H. Rossenwasser, MD, a General and Vascular Surgeon with Long Island Vein Care & Surgery

Get to know General and Vascular Surgeon Dr. Edwin H. Rossenwasser, who serves patients in Garden City, New York.

New York, New York City, Jul 15, 2021 ([IssueWire.com](http://www.IssueWire.com)) - Dr. Rossenwasser is a board-certified general surgeon & fellowship-trained vascular surgeon at Long Island Vein Care & Surgery in Garden City, New York.

He has been in practice on Long Island since 1982. For the past several years, he has devoted his practice to the treatment of venous disease, varicose veins as well as the treatment of chronic non-healing wounds.

“We treat all aspects of vein disorders and are committed to achieving the best outcomes. Our goal is to earn your trust and respect as well as to provide the absolute best care. In an era of fast fixes and health professionals performing procedures outside of their specialties, you will benefit from our over 30 years of vascular surgery experience” as stated on his website.

His hospital appointments include Mount Sinai South Nassau and Long Island Jewish Medical Center. He also serves as an Assistant Clinical Professor of Surgery at the Albert Einstein College of Medicine.

Back in 1972, Dr. Rossenwasser graduated magna cum laude and phi beta kappa with his Bachelor of Science degree from The City College of New York. He then went on to earn his medical degree from The Mount Sinai School of Medicine in 1976.

From 1976 until 1981, he performed his internship and residency at The Mount Sinai Hospital, where he served as chief resident. He then went on to perform his fellowship in vascular surgery at Englewood Hospital, completing his training in 1982.

A Fellow of the American College of Surgeons and a member of the American College of Phlebology, the doctor is board-certified in general surgery by the American Board of Surgery (ABS). The ABS is an independent, non-profit organization located in Philadelphia, Pennsylvania, founded for the purpose of certifying surgeons who have met a defined standard of education, training, and knowledge.

General surgery is a surgical specialty that focuses on abdominal contents including the esophagus, stomach, small bowel, colon, liver, pancreas, gallbladder, appendix and bile ducts, and often the thyroid gland. A general surgeon performs a wide range of abdominal surgeries for many forms of intestinal and abdominal wall neoplasms, gallbladder disease, gastric and pancreatic disease. They follow the patient through critical care and surgical recovery all the way to outpatient care.

Vascular surgery is a surgical subspecialty in which diseases of the vascular system, including the arteries, veins, and lymphatic circulation, are managed by medical therapy, minimally-invasive catheter procedures, and surgical reconstruction. A vascular surgeon diagnoses, treats, and manages conditions in the arteries and veins, also called the blood vessels. These specialists treat a range of health problems, from spider and varicose veins to life-threatening aneurysms, and can help patients manage chronic conditions throughout their lives.
