

# Fighting Crime and Fighting Germs: Law Enforcement Agencies Team Up With SafeHandles™

**California, Eureka, Aug 27, 2021 ([IssueWire.com](https://www.issuewire.com))** - Law enforcement agencies around the world are eliminating exposure to biohazards by partnering with SafeHandles™, a leading manufacturer of self-cleaning technologies. While police officers, sheriffs, correctional officers, and other industry leaders are enforcing the law, they're also putting safety measures into place at police departments, inside squad cars, and patrol units.

Most recently, the Eureka Police Department put the power of SafeHandles™ PURE® Hard Surface spray to use in its squad cars. Common touchpoints in squad cars include steering wheels, the back seat area, and door handles. Police officers who regularly transport suspects, need the convenience of Pure, allowing the cars to be cleaned of germs without the need to bring them back to the stations.

PURE® Hard Surface, an FDA and EPA-registered spray that kills the Human Coronavirus can eliminate 99.99% of bacteria, viruses, and fungi. It's a great tool for law enforcement agencies to ensure the health and well-being of their staff, while still having time to enforce the law. In addition to being so potent and killing germs in seconds, it is chemical-free and all-natural.

"While police officers are busy fighting crime, the self-cleaning technologies manufactured by SafeHandles™ will continue to fight germs, keeping law enforcement safe as they keep the public safe," said Founder Steven Strombeck.
