

Pride Doge Coin exploding over 6,000% to 300K Market Cap Over Night

From 8K to 300K over night this new charity based crypto is unstoppable

Oregon, Portland, Jul 19, 2021 (IssueWire.com) - [Pride Doge Coin](#) (PDoge), released July 2021, has exploded overnight expanding from just an 8K market cap on July 17th, 2021 to over 300K on July 18th, 2021.

With the rapid increase of cryptocurrency tokens, Pride Doge found it important to stand out with a charity use case that was the first to the market and presents an overall need.

PDoge was developed with the safety of investors in mind. The Liquidity Pool is locked via DxSale, and the contract is verified via BCS Scan.

Pride Doge is committed to raising awareness and donating to The LGBTQ Community - namely homeless youth and suicide prevention. Plans to donate to the Trevor Project and True Colors United are among the many along with the emerging roadmap.

PDoge is a community-driven token that has built-in anti-whale mechanics with a maximum transaction amount of .5% total supply to protect investors.

4% of each transaction is distributed back to existing holders, making the community financially stronger every day. This distribution, along with anti-whale mechanics encourages long holding patterns and token growth.

Pride Doge also aims to facilitate increased liquidity and therefore 4% of every transaction is added to the liquidity pool.

Currently, applications are submitted for both major listing sites - Coingecko and CoinmarketCap. The community is excited about the growth and visibility these listings will provide.

Pride Doge aims to give back through charity and build technology that can further the lives of underserved youth in the LGBTQ+ community.

The Pride Doge Coin community is growing, and the current investors are excited about the cause. This is proof of the concept that the road to success is ahead, and big things are around the corner.
