

Rad Web Hosting Announces AlmaLinux 8 for Dedicated Servers

Texas, Dallas, Jul 12, 2021 (Issuewire.com) - We are happy to announce that [AlmaLinux](#) is now available to deploy with [Dedicated Servers](#). **AlmaLinux 8.3** has just been added to the available OS templates for Dedicated servers. This template is available for immediate deployment and can be selected from the "OS Reinstall" menu in the Server Panel for existing servers.

What's new in AlmaLinux?

Below is a list of notable changes/new features:

- Matches the current RHEL release 1:1
- Effortless transition from [CentOS](#), with minimal investment and no software changes
- AlmaLinux plans to offer 8.x release support commitment through 2029
- Forever free and open-source: no licenses, no usage restrictions, freely re-distributable

For full documentation: [AlmaLinux 8.3 Release Notes](#)

How to Deploy AlmaLinux 8 Server?

For full access to all of the upgrades, improvements, and new packages, launch your own AlmaLinux 8 server on bare-metal [dedicated servers](#). New clients can save 25% with promo code **"NEWHERE"**!
