

# SB Aesthetics Medical Spa Services Are Among The Best In Santa Barbara For The Non-Surgical Approach To Facial Rejuvenation

SB Aesthetics has established a strong reputation among Santa Barbara patients for providing medical spa treatments that are minimally invasive and non-surgical in nature.

**California, Santa Barbara, Jul 24, 2021 ([IssueWire.com](https://www.issuewire.com))** - The medical spa services are already available, and they comply with CDC regulations, which include social distance.

Dr. Sheffield has a long and distinguished career in cosmetic surgery, and as the founder and director of SB Aesthetics, he understands what is best for his patients. Dr. Sheffield is a board-certified plastic surgeon. Dr. Sheffield has over 30 years of expertise in providing a variety of medical spa services in Santa Barbara to help patients revitalize their skin. The facility is now offering facial rejuvenation treatments as well as other specialty services. These are non-surgical treatments that are minimally invasive in nature. These cosmetic treatments are specifically designed to improve the health of the patient's skin and give them a bright shine.

SB Aesthetics Medical Spa is a contemporary, minimally invasive, non-surgical facility that offers a wide range of treatments, according to Dr. Sheffield "We provide a variety of medical spa treatments, such as [laser hair removal Santa Barbara](#), acne treatment, tattoo removal, skin resurfacing, restoring skin volume loss, and other cosmetic procedures. As well as cosmetic dermatology services such as [Botox Santa Barbara](#) for the smoothing away of wrinkles and fine lines and the skin folds, we perform skin tightening, enhancing and reshaping the skin, removal of spider veins, [lip injections Santa Barbara](#) to improve lips symmetry and increase volume, and other related procedures."

A personalized treatment plan is created for each individual patient at SB Aesthetics Medical Spa based on the specific service they have requested. The total effect of these treatments is very substantial, as they help to restore the skin's young look to its former glory.

"All of the medical spa treatments are provided in our Santa Barbara office," says the doctor. Our goal is to make our patients feel good about themselves in their own skin. The treatments are intended to improve the appearance of the skin while also making you feel more confident and rejuvenated. Another distinguishing feature of our medical spa is that we only utilize FDA-approved materials for our cosmetic procedures," he went on to say further. I take great care to ensure that all of the injectables, lasers and non-surgical treatments are done out safely and effectively. You will receive natural-looking outcomes at our medical spa, rather than the operational results," he further adds.

[SB Aesthetics Medical Spa](#) performs the majority of its treatments under a nerve block and/or local

anesthetic, which allows for faster healing, lower costs, and less downtime for patients. There are certain dangers, but in general, the patients have only minor physiological effects, and with prompt recovery, they may return to their jobs within a few days. In order for patients to feel comfortable in their own skin, the goal must be achieved via skincare.

## About SB Aesthetics Medical Spa

Dr. Sheffield is the owner and operator of [SB Aesthetics](#), a medical spa in Santa Barbara. In recent years, it has developed into a facility that offers a variety of minimally invasive and non-surgical treatments such as facelifts, mini-facelifts, and short scar facelifts, as well as many other medical spa services such as facials, laser hair removal, Botox, and lip injections.

## About Dr. Sheffield

Dr. Robert W. Sheffield is a third-generation plastic surgeon who specializes in non-surgical and minimally invasive treatments such as facelifts and breast augmentation. He graduated from the University of Tennessee School of Medicine, conducted a surgical internship in Los Angeles, and finished his residency training at the University of Florida School of Medicine. In San Diego, he has done a large number of difficult reconstructive operations.

He received his premier training in plastic surgery from the University of Texas Southwestern Medical Center in Dallas. He is the founder of the Annual Rhinoplasty Symposium and a life member of the American Society of Plastic Surgeons and the American Society of Aesthetic Plastic Surgery, among other organizations.
